

# PHONO BOX E

## Phono preamplifier

MSRP 69 € (incl. VAT)

- Amplification and RIAA equalisation for MM cartridges
- Design principle inspired by Dr. Sykora
- SMD circuitry
- Special low noise components
- Internal metal shielding
- Small size allows installation close to record player
- Gold plated RCA connection sockets
- Outboard power supply included
- Black or white casing

colour options:

**Input impedance:** 47kohms  
**Input capacitance:** 120pF  
**Gain:** 40dB  
**Output voltage (typically):** 500mV @ 1KHz with 5mV input  
**Noise floor:** 88dB (A weighted)  
**THD:** <0,04%  
**RIAA equalisation accuracy:** 20Hz -20kHz (+0,5/ -,02dB)  
**Input:** 1 pair RCA socket  
**Output:** 1 pair RCA socket  
**Outboard power supply:** 18V/500mA DC; 220 - 240V, 50Hz  
**Standby power consumption:** < 1 watt  
**Power consumption:** 20mA DC  
**Dimension W x H x D (D with sockets):** 120 x 32 x 100 (115)mm  
**Weight:** 269 g without power supply

## Phono Box E: Pure vinyl listening pleasure at an absolute bargain price!

Today, many amplifiers do not have a specific phono cartridge input. Phono Box E is an ideal phono preamplifier for these hifi systems. Phono Box E accepts MM cartridges and offers an audiophile music experience at an entry-level price. Advanced circuitry and SMD construction keep noise and distortion at a surprisingly low level. A built-in internal shielding and an outboard DC power supply leave no risk for external interference. Because of its small casing, Phono Box E can be placed near the turntable. Input and output sockets are

gold-plated for preservation of quality. Phono Box E can be connected easily to a line-input (AUX etc) of your amplifier.
