AUDIOVECTOR R8 ARRETÉ

NEW & INNOVATIVE TECHNOLOGIES · ULTIMATE SOUND QUALITY · SCANDINAVIAN DESIGN

WE STRIVE FOR THE ULTIMATE SOUND REPRODUCTION & BUILD QUALITY IN OUR NEW HIGH-END LOUDSPEAKER

WE EXPECT THE AUDIOVECTOR R 8 ARRETÉ TO SET A NEW STANDARD IN ITS SEGMENT

CONCEPTS AND TECHNOLOGIES:

- The new Audiovector Cross Woven Sandwich Carbon Driver is made to improve our already class leading drivers: Much lighter, stiffer and more sound dead membranes to produce a faster and more uncolored sound. Our new membranes are made from precision woven aramid fibers, sandwiched with artificial wood resin.
- A delicate balance combining our award-winning internal isobaric compound bass system with a hand built 4-inch rear firing bass/midrange driver. Seamlessly integrated with the new Audiovector quasi rear firing 3rd generation Air Motion Transformer tweeter.
- Cryogenically treated 7-nines pure copper asymmetrical wiring and Audiovector Nanopore damping material gives a smooth and natural musical reproduction.
- The Freedom® earth grounding system, engineered by Audiovector, is a complex distortion eliminating construction. The effect of Freedom® brings about improved overtones, lower noise floor, increased image depth with tighter focus and wider soundstage. You will also find that pace, dynamics and musical expression have surpassed existing standards.

SPECIFICATIONS:

Frequency response	22 – 52 kHz
Sensitivity	92.5 dB/W/m
Impedance	8 Ohms
X-over frequencies	100/250/3000. 2nd gen. DFF Linear Phase cryogenically treated
Power handling	500 W
Principle	4 way with rear radiation

Bass system	8" + 6" Compound bass reflex
Bass/Mid Drivers	Audiovector titanium Aramid Sandwich
Treble Driver	Audiovector 3.rd gen. high efficiency AMT with Acoustic Lens
Star Earth Grounding	Audiovector Freedom Purifier
Dimensions (cm)	145 x 21,8 x 47
Weight	69.8 kilos
